DRILLING TO COMMENCE AT PROSPECTIVE LAKE WAY PROJECT

Newera Uranium Limited (ASX: NRU) is pleased to advise that it has contracted the services of a Kalgoorlie based drilling company to undertake a reconnaissance air core drilling program within Newera's prospective Lake Way project (E53/1193) approximately 15km east/north east of Wiluna.

The planned 6,600 metre program is designed to test potential calcrete hosted uranium targets within a significant Tertiary palaeochannel which underlies the more recent Kukabubba Creek drainage system. The target area is upstream and to the north of Nova Energy's Lake Way uranium deposit.

All clearances are in place and the program is timed to commence on 1st February 2008.
