Newera Appoints Mark Hill as Exploration Manager

Newera Uranium Limited (ASX: NRU) is pleased to advise that in the lead up to a series of drill programs to test five (5) uranium prospects in the Gascoyne Basin of WA and one prospect in the Harts Range of the Northern Territory, after an extensive search, Mr Mark Hill has been appointed the Company's Exploration Manager.

Mr Hill is a geologist with over 18 years experience in exploration, mining and project development. He has worked in a variety of locations across Australia and overseas. Since 2002, he has worked as a consultant geologist to a range of companies involved in uranium, gold, iron ore, lead/zinc, copper and nickel laterite, including Ashburton Minerals, Jackson Gold, Resource Mining Corporation, Shaw River Resources and Alchemy Resources Ltd.

Newera has made significant progress over the past few months with regard to completing Native Title heritage surveys and gaining all necessary approvals from the Western Australian department to undertake the planned drill programs. The Company is confident that all surveyed drill targets will be cleared.

Four of the five Gascoyne Basin (WA) prospects and the prospect in the Harts range (NT) have known uranium mineralisation associated with each prospect. The remaining prospect to be tested in the Gascoyne Basin is as a result of a recent VTEM survey completed over E09/1298.

We welcome Mark to the Company at a point where we consider Newera to be on the cusp of a significant period of exploration activity.
